

### Lose a player game

#### How it works

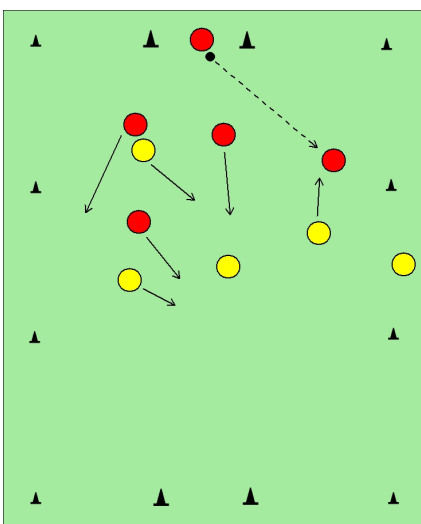

Red and yellow teams play a 5 v 5 game within the playing area.

Normal rules apply as the two teams try to score.

Play continues until a team scores a goal.

The ball is retrieved and play is restarted by the red team.

However, a player is taken away so the yellow team are left playing 4 v 5.

If the red team scores then the yellow player can come back into the game and equal teams are restored. However, if the yellow team were to score again then another player would be lost to make it 3 v 5.

Different players must go off each time to make it fair.

#### Possible changes

The player can go back after a period of 2/3 minutes if a goal is not scored in that time by either team.

The player could be made to do a task before being allowed back into the game, the funnier the better.
