

Large area - dribbling

Guardians of the cones 1

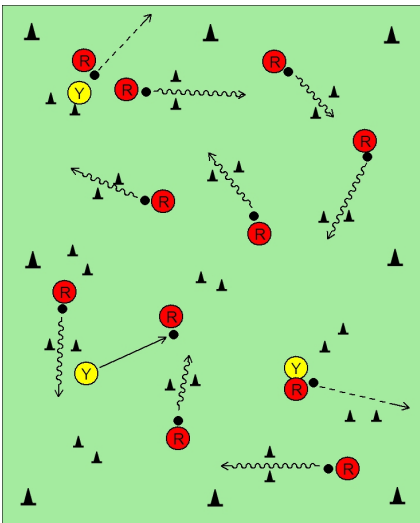

How it works

The three yellow players need to wear a bib/pinny and be a 'Guardian of the Cones.'

They do not tackle but just move around stopping players getting through the cone gates, making them turn away to go through another.

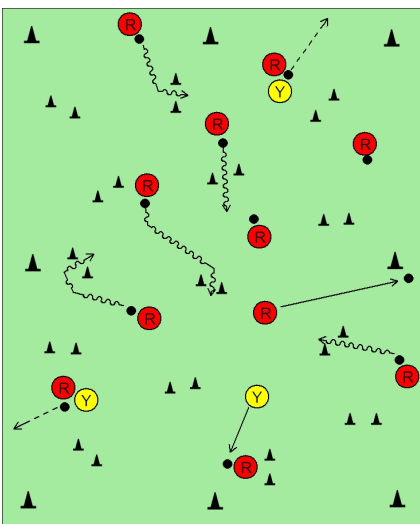

The red players must try to dribble through as many cone gates as possible in 30 seconds/1minute.

.

Possible changes

Allow the Guardians of the Cones to tackle and kick the players balls out of the area.

Balls that are kicked out of the playing area can be retrieved and the players can then continue dribbling through the cone gates.

How many cones can the red players dribble through altogether in one minute? (You will have to trust them to give a correct score as you add them up).

Choose three different Guardians of the Cones and see if they can stop the red players beating the previous total.
