

Cone gates game

How it works

Play 5 v 5 under normal game rules but no goalkeepers are allowed

If any team completes a pass or dribbles the ball through a cone gate in their own half of the playing area they get one point.

If any team completes a pass or dribbles the ball through a cone gate in the other team's half of the playing area they get two points.

If they score a goal they get three points.

If the yellow team win possession then they attempt to do the same, scoring as many points as possible.

Can either team achieve a 'perfect goal' by going through a gate in each half of the playing area and then scoring, equalling six points.

Possible changes

A team **MUST** complete one or two passes through a cone gate before they are allowed to score a goal.
