

### Three goal game

#### How it works

Red and yellow teams play a 4 v 4 game within the playing area whilst a fifth player stands behind the three cone goals at each opposite end.

Normal rules apply as the two teams try to score in any of the three small cone goals at each end of the playing area.

The players at each end can move from one goal to another as long as they stay behind the line of the cones.

In order to score a goal, the player behind the goals must move in line and stop the ball between the cones or just behind the cone goal for it to count.

The player who supplied the pass then swaps places with the player behind the goals.

Play then continues with a red player passing the ball from just in front of the same goal.

#### Possible changes

The cone goal can be removed once it has been scored in so that a team must score through each of the three goals to win the game.

Play without the player behind the goals and just pass through any of the goals to score.

You can play any numbers on each side.
