

Cone running

How it works

Three players stand in a grid, one with a ball.

Player 1 passes the ball to player 2 and then starts to make a run around a corner cone.

Player 2 passes to Player 3 and then also starts to make a run around a corner cone.

Player 1 continues their run around a corner cone to get back into the grid.

Player 3 passes to Player 1 and starts to make a run around a corner cone. Player 2 continues their run to get back into the grid for a pass from Player 1.

The drill continues with this repeated passing and moving sequence.

Challenge the players to keep passing sequence going with no errors for 30 seconds/1 minute. Which group can keep going the longest without an error?

Possible changes

First touch passing only.

Have two groups of three working separately in the same grid at the same time - this really tests them!
