

Diagonals

How it works

Three players stand by a cone in a different corner of the grid, one of them with a ball.

Player 1 dribbles with the ball to the spare cone.

Player 1 turns at the cone and passes diagonally across the grid to Player 2.

Player 2 dribbles with the ball to the spare cone and then turns to pass diagonally across the grid to Player 3.

Player 3 then dribbles to the spare cone and passes diagonally across the grid to Player 1. The drill continues with this repeated passing and moving sequence.

Challenge the players to keep the passing sequence going with no errors for 30 seconds/1 minute. Which group can keep going the longest without an error?

Possible changes

Reverse the direction of the drill so that Player 3 starts with the ball (see first diagram) and the players are moving and turning in a different direction.
