

Passing combo

How it works

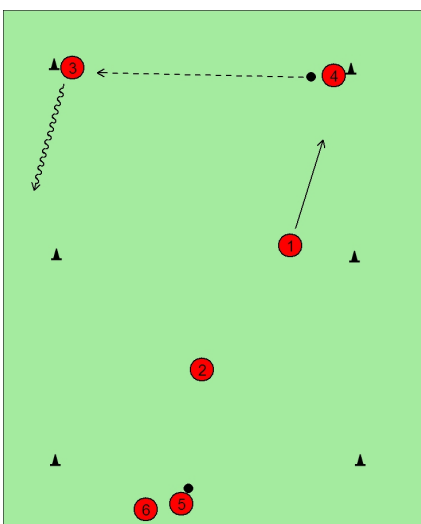

This drill takes place in two adjacent grids.

Player 1 starts the drill by passing the ball to either side of Player 2.

Player 2 then passes the ball ahead of Player 1 to run on to.

Player 1 then passes to Player 4 and follows the pass to take that place.

Player 4 then passes to Player 3 and Player 4 follows the pass to take that place.

Player 3 dribbles the ball back up to the starting point and joins the end of the line.

Player 5 repeats the drill by passing to either side of Player 2 as soon as Player 1 has reached the far corner cone.

Change Player 2 after a few repetitions.

Possible changes

Player 2 picks up the ball and feeds it to the other players for them to control on the move and then pass.
