

## Half pitch 5 v 3 + 1

### How it works

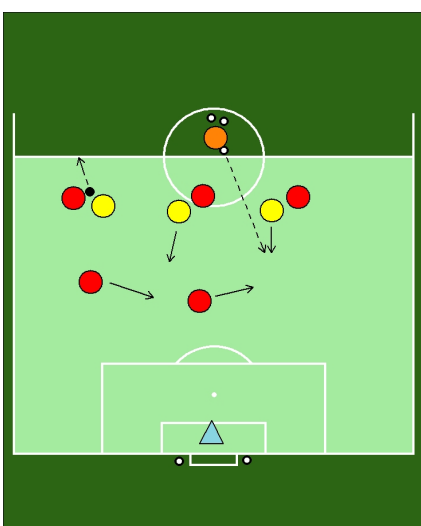

Play is set up as shown in the diagram with 5 v 3 plus a goalkeeper playing against each other within a half pitch area.

Play is started with a pass from the goalkeeper to one of the red players.

The red team have to try and keep possession of the ball and combine to pass to the neutral orange player inside the far half of the centre circle.

If the yellow team win possession of the ball they can dribble or pass to each other to try and create a scoring opportunity.

If the ball goes out of play at any time the orange player can immediately make a pass to any of the yellow players to try and create a scoring opportunity.

If the red team win possession back they can try and pass to the orange player.

If the yellow team score or miss play is restarted by a pass from the goalkeeper to any of the red players.

Change roles and play again keeping score between the two teams.

### Possible changes

Allow the orange player to join the yellow team after making the pass to them or if they win possession from the red team.

Play 6 v 3 or 5 v 4 depending on numbers or ability of your group.
