

**X passing**

How it works

Two players stand by a cone on one side of the grid whilst the third player stands in the middle with a ball at their feet.

Player 3 starts by passing to Player 1.

Player 1 passes back to Player 3 and then makes a move to the cone at the other side of the grid.

Player 3 then passes to Player 2 whilst Player 1 continues their run to the other corner cone.

## Grid - passing

Player 2 passes back to Player 3 and then makes a move to the cone at the other side of the grid.

Player 3 then turns and passes to Player 1 whilst Player 2 continues their run to the other corner cone.

The passing sequence then continues as shown in the diagram.

Challenge the players to keep the passing sequence going with no errors for 30 seconds/1 minute. Which group can keep going the longest without an error?

Change roles and try and beat previous records.

### Possible changes

Player 3 could pick the ball up and feed in for Player 2 and 3 to perform chest/knee control and then pass back or for a header.

First touch passing only.
