

### Passing switchover 2

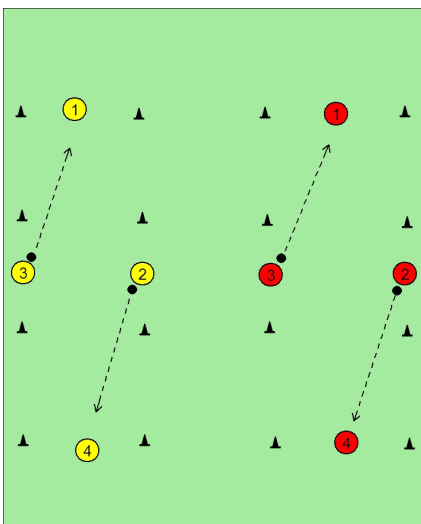

#### How it works

Players are positioned at each end of the channel with two players in the middle. All the passes must be made at the same time to keep this drill going.

Player 1 starts by passing to Player 3 whilst at the same time Player 4 passes to Player 2.

Players 2 and 3 then pass across the channel to each other.

Players 2 and 3 then pass back to Players 4 and 1.

Players then change roles so Players 2 and 3 are passing from the end of the channel.

Challenge the players to keep this passing sequence going with no errors for 1/2 minutes. Which group can keep going the longest without an error?

#### Possible changes

After the switchover Player 2 passes on to Player 1 and Player 3 passes to Player 4.

When Players 1 and 4 receive the ball back from the middle they could also make another switchover by passing to each other before passing back to Players 2 and 3.
