

**3 v 2 + gk**

How it works

Play 3 v 3 with normal game rules.

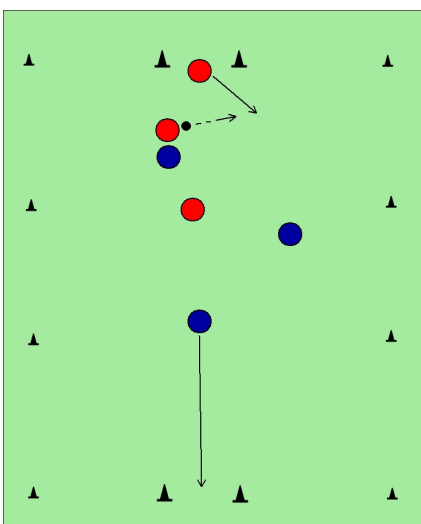

Blue team starts with possession and have to try and dribble/pass the ball between them to advance up the field of play.

The red team defend the goal at their end of the playing area.

One of the red players must stay in the goal as long as the blue team have possession

Blue players continue to attack as they have possession of the ball.

As soon as the blue team lose possession, one of their players must drop back into the goal giving the red team a 3 v 2 advantage in the middle of the field.

If the red team score a goal then they return to 2 + GK and the blue team start with possession at their own goal.

Possible changes

Can play 2 v 1 + GK or 4 v 3 + GK.

To give the team in possession even more of an advantage, 1 player has to drop back into the goal and another player has to leave the field of play until a goal is scored or possession is won back by their team.
