

Top gun

How it works

Players have a ball each and dribble around the inside playing area keeping control of the ball and their heads up.

The idea of the game is to keep control of your own ball whilst also trying to kick the ball of another player out of the playing area.

If a player's ball is kicked out they must go into the outside area. If they can intercept a ball that another player has tried to kick out, or just lost control of, then they can get back into the game with that ball.

If players get too defensive when there are only 2/3 left then set a time limit for a player to make a move or else they are out.

The winner (Top Gun) is the last player left in with a ball.
